

[University Letter Head]

Letter of Recommendation

To whomsoever it may concern,

I find utmost delight in recommending Mr. Sukhpreet Kaur for MS Computer Science at your prestigious institution. Over the course of her education under me I found her to be an extremely sincere and diligent student who was always among the top performers of her class.

During her education I taught her the following subjects:

- Operating Systems in V semester
- Software Engineering in VI semester
- Cloud Computing in VII semester

Sukhpreet is a hardworking individual who wants to excel in her chosen field and puts in sincere efforts to achieve the same. I found her to be a person who would always want to explore beyond textbooks and learn from various sources. She would participate in conferences, seminars and workshops; and in third year organized two of them at her college.

In seventh semester she had presented a paper "Neural Networks for Disruptive Manufacturing" that won her second prize in PTU Techfest. Her final year project was honored by PTU Techfarm as among the top 10 finalists. Her professional nature makes her effective and down to earth.

I am in support of her decision to pursue higher education and thus would give a strong recommendation to do her graduate studies at your institute.

Mr. Kamal Kaushal
